EVERYDAY BOTTLE

COLLECTION

Looking for 81 new reasons to get excited about daily hydration? Meet all your favorite bottle styles in Tritan™ Renew – the sustainable new plastic material made with 50% recycled content. Vibrant new colors and fun saturated graphics permeate our collection of long-lasting and durable copolyester and vacuum stainless steel. Satisfy your thirst for sustainability.

A BETTER LIFE FOR OLD PLASTICS

Breathing new life into plastic waste is harder than it seems. Much of what's recycled ends up in landfills and incinerators or is mechanically chipped and recycled into new products that don't always have the durability needed for daily use. There is science in the solution. Polyester Renewal Technology (PRT) is more efficient than mechanical recycling and produces new material that is made with 50% recycled content. Less virgin plastic needed for new products means saving precious environmental resources. Tritan Renew is highly durable, dishwasher safe, and free of BPA, BPS, and BPF chemicals. Our reusable bottles made better.
